Department of Military Science

"Equal Opportunity/Diversity Training and Education"

Going Well:

MS instructors are instructing different equal opportunity and diversity topics each quarter.

Project Description:

The UO Military Science program promotes equal opportunity and instructs students on how to identify discrimination and promote equality. Also, incorporate the Army Values into the instruction (Loyalty, Duty, Respect, Selfless-Service, Honor, Integrity, Personal Courage).

Lesson Learned:

Although implementing the Army Values to non-Cadets is sometimes difficult, the promotion of equality and diversity is valued in both the Civilian and Army perspective.

Challenge:

One key challenge is inculcating the Army Values to those students who are only taking MS classes.
